Subject	INTRODUCTION TO INTERNAT			
	Туре	Semester	ECTS	Code
	(M)	II	5	
Course lecturer				
Course assistant Course tutor				
Aims and objectives	The purpose of this course is to provide students with a basic understanding and also to inform the fundamental principles of international relations. In the context of this subject will be discussed and analyzed the main theories of international relations, the actors and the most important factors and current issues of the international system in the XXI century. Acquisition of the main theories that will be dealt within the course will serve as a stable foundation for students to further studies in this field. Also the acquisition of this knowledge will help them develop the critical thinking skills they need to analyze scientifically conflicts between states. In this course will be discussed also issues related to global welfare policies, such as war, global poverty, trade policy, environmental issues, human rights, terrorism, etc. The program will highlight the concept of balance of power, the global distribution of wealth, the ethics of war, etc. At the end of this course the students will have a comprehensive understanding of the main concepts and principles of international relations and they will also gain analytical skills sufficient to examine scientifically the global political system.			
	 Upon successful completion of this course, students will be able to: Discuss and explain the different attitudes and theoretical analysis used in the field of international relations for the purpose of scientific interpretation of world political events Describe the historical development of interstate relations and the place and role of the state in these reports. Analyse the specific issues that are important in the study of interstate relations, national security, war, economic integration, trade etc.

	Preparation for final exam			Week XIII
	Final exam			Week XIV
	Teaching/Learning activity			Weight (%)
	Teaching methods used for this course include:			
	Lectures in classroom			30%
Teaching/Learni ngmethods	Encouraging learning by- doing and revisions based on feedback from lecturer In-class group discussion Assignments (essays and case studies)			25% 25% 20%
	Assessment activity	Number	Week	Weight (%)
	The final assessment will be based on:			
Assessment Methods	Participation and being active in lectures			
	Assignments (essays, case-studies)			
	The final test: theory and final essay			
	Number, type and method of evaluation:			
	Active participation in lectues			10%
	Home Assignments (essays, case- studies, in a written form)			30%
	The final test: theory and final essay			60%
	To receive a passing grade, every student must have comprehensive knowledge of the content of the subject and to submit regular duties. Participation in class discussions, assignments, and especially the ability to analyze and criticize the studied material, and build a personal argument relied on, are the criteria for the highest rating.
